

Join the **FREE, VIRTUAL** workshop series: **Circle of Security®** in the **Early Childhood Classroom** starting **Thursday February 3rd!**

What Is Circle of Security®?

The Circle of Security® series looks at how children's relationships with the adults in their lives can be used to encourage positive behaviors, support young children's feelings and help them learn.

The Circle of Security in the Classroom approach has been designed to enhance teachers' abilities to form secure relationships with the children in their care. Since secure attachment is associated with academic achievement, promoting security in childcare and preschool settings is critical.
